Thanks Margo.

I believe the ARC/GIS formatted maps would be helpful, so please forward them along. Thank you.

Linda,

My apologies for the delay. We do not have a CAD drawing for the Site. Dan informs me that we do have other figures, but they are in ARC/GIS or some other format. Would this be useful to your consultant?

Regards,

Margo B. Ludmer

I have received word back from DEC's legal counsel Andrew Guglielmi that the site will likely be deemed eligible for the NYS Brownfield Cleanup Program (BCP) because some of the metals data exceeds the commercial soil cleanup standards.

Therefore, we plan to commence preparation of the BCP Application.

Our consultant was wondering if he could get a CAD drawing base map from one of your consultants. Please advise if this is possible. Thank you for your continued cooperation. Linda

Hi Linda,

Please see attached. The pre-remedial team only sampled for metals and radionuclides; they did not perform a full analysis.

Best,

Margo

Thank you for the call yesterday. I have reached out to DEC re: BCP eligibility for radioactive sites. In the interim, please advise if you can send the pre-remediation assessment report you discussed on the call yesterday, with the non-radioactive results. Thank you, Linda

Linda,

Dan and I could speak with you next week on Monday or Thursday. Our schedules are flexible on those days. Please let us know what would work on your end.

Regards,

Margo

Hi Linda,

We can certainly set up a time to talk. Did you receive my email, dated April 18, regarding the below requests? If not, I can resend.

I am the new environmental counsel for Mark Stagg, one of the owners of the Canadian Uranium Site. You met my partner Dwight Kanyuck at a meeting last June. We were hoping you can help us obtain the following recent information and set a time to discuss the status of a Remedial Action that would be acceptable to EPA for the site:

1. Geological Information about the Site – depth to groundwater and thickness of the aquifer (Report called Final Phase III Removal Assessment Trip Report May 15, 2017 indicates two different groundwater depths 5 ft bgs and 23 ft bgs)
2. Off-Site groundwater investigation results
3. Status of a Remedial Action Work Plan or a conceptual remedial action

Please advise if we can set up a time to talk. Thank you, Linda Shaw
